DIATHONITE CORK RENDER

Diathonite Finition

IT

Diathonite Cork Render è una innovativa finitura colorata a base di resine acriliche in base acqua e puro sughero. Un prodotto elastico, resistente, traspirante, che contribuisce all'isolamento termico ed al risparmio energetico, da utilizzare per la decorazione di facciate, pareti e pavimenti, in interno come in esterno.

EN

Diathonite Cork Render is an innovative colored finish made of water based acrylic resin and pure cork. It is elastic, resistant, breathable, it contributes to thermal insulation and energy saving, to decorate facade, walls and floors, both inside and outside

FR

Diathonite Finition, est une finition innovante, colorée, à base des résines acryliques à base d'eau et de liège pur. Un produit élastique, résistant, perspirant, qui contribue à l'isolation thermo-acoustique et à l'épargne énergétique, à utiliser pour la décoration des façades, des parois et des planchers, à utiliser à l'intérieur et à l'extérieur.

ES

Diathonite Cork Render es un revestimiento de colores de acabado formulado con resinas acrílicas 100% con base de agua y corcho puro en gránulos de tamaño seleccionado y controlado. Materiales naturales de rápida renovación y absolutamente inocuos para el ambiente y para la salud de las personas.

PT

Diathonite Cork Render é um acabamento colorido de base aquosa, constituído por resinas acrílicas e aglomerado de cortiça seleccionada de granulometria controlada. A cortiça é um material natural, reciclável, não poluente para o ambiente nem perigoso para as pessoas.

DE

Diathonite Cork Render ist eine farbige Oberflächenverkleidung in einer Zusammensetzung aus Acrylharzen auf Wasserbasis und reinem granuliertem Kork in einer ausgesuchten und kontrollierten Körnung. Natürliche, rasch erneuerbare und für die Umwelt und die menschliche Gesundheit absolut ungefährliche Materialien.

NL

Diathonite Cork Render is een innovatieve, kleurrijke wandafwerking van acrylhars op waterbasis en kurkgranulaat. Het is een elastische, resistente, damp-open, thermisch isolerende en energiebesparende manier om uw gevel, wand en vloer te decoreren. Zowel binnen als buiten te gebruiken.

RU

Диатонит Корк Рендер это инновационное покрытие из настоящей пробки и акриловой смолы в водном растворе. Оно используется для финишной отделки полов и стен, как внутри, так и снаружи помещений. Материал способствует термоизоляции, обладает дышащими и водооталкивающими свойствами, а за счет эластичности и прочности великолепно ложится практически на любую поверхность.
